

Imagine Math & Math Facts | 2024-2025

The State Department of Education has partnered with Imagine Learning to support Idaho students from kindergarten through geometry. Imagine Math combines a rich curriculum with fun, adaptive digital experiences to help students be confident math learners.

ALL Idaho educators & students have access to the following math programs:

imagine
math®

Through age-appropriate learning environments and a system of adaptive assessments, students encounter the “just right” amount of challenge with a focus on scaffolding up to grade-level proficiency for Pre-K through geometry.

imagine
math facts®

Vibrant visual effects, a captivating 3D world, and immediate feedback boost students’ interest as they build critical math fact fluency. Math Facts makes fluency practice fun, fast, and effective through game-based activities for all learners.

Please register for as many sessions as desired.

We encourage you to register to receive a recording of the webinar, *even if you cannot attend*. A video link and corresponding resources will be sent to all registrants following the session.

Idaho Professional Development Plan

Month	Date	Time (MST)	Session Title	Description	Registration Link
August	Tuesday 08/20/24	8:00 - 9:00 am	Getting Started w/Imagine Math PK-2	Build a solid understanding of both the teacher and student experience and key steps to take to get started with success. Learn how to manage student settings and dive into the powerful adaptive content, the benchmark assessment system using the Quantile® framework, quality math instruction, STEM extensions, actionable reports, and even live teachers for grades 3+.	Register Here
	Tuesday 08/20/24	3:30 - 4:30 pm	Getting Started w/Imagine Math 3+	Build a solid understanding of both the teacher and student experience and key steps to take to get started with success. Learn how to manage student settings and dive into the powerful adaptive content, the benchmark assessment system using the Quantile® framework, quality math instruction, STEM extensions, actionable reports, and even live teachers for grades 3+.
